## **【News】 CYBERDYNE joins Nippon Keidanren**

### **~Making contribution to Society 5.0 for SDGs with Cybernics Technology~**

CYBERDYNE Inc. (Tsukuba, Ibaraki, CEO: Yoshiyuki Sankai; from now on referred to as "the Company") has joined Nippon Keidanren (Japan Business Federation from now on referred to as "Keidanren") as of July 15, 2021.

**Keidanren**  
Policy & Action

#### ◆ Purpose of joining Keidanren

Keidanren is a comprehensive economic organization that consists of Japan's leading companies and organizations. KEIDANREN establishes consensus in the business community on various important domestic and international issues for their steady and prompt resolution. With "Society 5.0 for SDGs" as its keyword, Keidanren is currently accelerating its efforts to achieve "new growth through digital transformation," "transformation of work styles," "regional development," "reconstruction of the international economic order," and "realization of green growth" by maximizing the use of innovative technologies.

The Company will contribute to Keidanren's goal by participating in Keidanren's activities and collaborating with member companies through the development of business and innovative Cybernics Technology. The Company will also strengthen collaboration with Keidanren and its member companies to create a business environment that facilitates the further creation of innovations that contribute to the sustainable development of the Japanese economy and improvement in the quality of life for the Japanese people.

◆ Business of CYBERDYNE

The foundation of Cybernics Technology is the Internet of Humans/Internet of Things ("IoH/IoT"), Robots, and AI. The technology connects various fields such as medicine, nursing-care, production, and other workplaces with households. The Group aims to create a new industry based on this technology to solve various problems that exist in our society today. The Group's business has a unique advantage in its ability to access and integrate information inside the human body (such as Brain-nerve and vital systems) and information outside the human body (such as behavioral, life, and environmental). The information obtained will be sent to a supercomputer for analysis and AI Processing to discover innovative solutions to social problems.

◆ The Company's initiative to achieve Sustainable Development Goals

**Four projects that contributes to achieving SDGs**

 <p><b>10 REDUCED INEQUALITIES</b></p> <p><b>Develop Cybernics Technology to support people with reduced physical function</b></p> <p><b>Main initiatives</b></p> <ul style="list-style-type: none"> <li>Disseminate Cybernics Treatment that promotes functional improvement and regeneration of the brain, nervous system, and muscular system using a Wearable Cyborg HAL, as a global standard treatment</li> <li>Disseminate Wearable Cyborg HAL to improve the level of care required by the elderly and prevent severe illness and prevent frailty and maintain independence as physical functions decline with age</li> <li>Develop Cyn for Living Support for people with severe disabilities who cannot speak or write as they wish due to the progression of intractable diseases to communicate and operate machines without speech or physical movement</li> </ul>	 <p><b>3 GOOD HEALTH AND WELL-BEING</b></p> <p><b>Health Risk Management with Cyberdyne Cloud</b></p> <p><b>Main initiatives</b></p> <ul style="list-style-type: none"> <li>Develop Cyberdyne Cloud to accumulate, analyze, and perform AI processing of big data on people and things (IoH/IoT big data) obtained through all Cybernics Technologies equipped with communication functions</li> <li>Realize personalized healthcare through Cyberdyne Cloud</li> <li>Develop sensing technology to monitor vital information daily</li> <li>Develop HAL at Home as a new service that can share user's information on their training sessions conducted at home using HAL with medical and care facilities</li> </ul>	 <p><b>9 INDUSTRY, INNOVATION AND INFRASTRUCTURE</b></p> <p><b>Form social infrastructure to create the Cybernics Industry</b></p> <p><b>Main initiatives</b></p> <ul style="list-style-type: none"> <li>Establish a system to support companies and human resources that develop and deploy technologies and services that solve social problems</li> <li>Construct Cybernics Innovation Base to promote innovation in the medical and biotechnology fields</li> <li>Continue the projects at the Next-generation multi-purpose robotized production facility to induce innovation in the production field</li> </ul>	 <p><b>11 SUSTAINABLE CITIES AND COMMUNITIES</b></p> <p><b>Realize Society 5.0/5.1, a future society that accelerates innovation</b></p> <p><b>Main initiatives</b></p> <ul style="list-style-type: none"> <li>Develop mobility technologies that are safe, affordable, and ready for use by all people</li> <li>Develop a future city where all people, including the elderly and disabled, can easily access public spaces</li> <li>Establish educational institutions that develop knowledge and skills to help people</li> <li>Create shared spaces that promote innovation and scientific research and areas for field testing</li> </ul>
